

D Rupesh Kumar

Full-Stack / Backend Developer

+91 84359 77135 | rupeshkumar45670234@gmail.com
Portfolio | LinkedIn | GitHub

Profile Summary

Full-Stack Developer and MCA candidate with hands-on experience building secure web applications using React, Node.js, Express.js, MongoDB, REST APIs, JWT authentication, and Socket.io. Built and deployed projects involving client-side encryption, role-based workflows, responsive interfaces, and API-driven backends. Seeking entry-level Full-Stack, Backend, Node.js, or Software Engineer roles.

Technical Skills

Languages: JavaScript, Java, Python, SQL, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io, WebSocket

Frontend: React.js, Next.js, Tailwind CSS, Vite

Databases: MongoDB, Mongoose, PostgreSQL, Prisma

Tools & Deployment: Git, GitHub, Docker, Linux, MongoDB Atlas, Supabase, Vercel, Render

Experience

Independent Full-Stack Developer

Apr 2026 – Present

Self-employed

Remote

- Built full-stack applications using React, Node.js, Express.js, MongoDB, REST APIs, and Socket.io.
- Designed API routes, authentication flows, database models, responsive interfaces, and deployment configurations for independent projects.
- Developed security-focused and civic-technology applications, documenting project architecture and source code through Git and GitHub.

Projects

VaultGuard – Zero-Knowledge Password Manager | *React, Node.js, Express.js, MongoDB*

GitHub | Live Demo

- Engineered a multi-client password manager around a zero-knowledge model, deriving keys client-side and encrypting credentials with AES-256-GCM before synchronization so the backend stores only ciphertext and cryptographic metadata.
- Implemented OPAQUE-based password authentication, JWT session handling via HTTP-only cookies, in-memory web key management, and secure offline vault access for Android and browser extensions.
- Structured the system as a decoupled React/Vite client, Express/Mongoose API, native Android layer, and Manifest V3 extension; deployed the web client and API on Render.

FinTrack – Personal Finance Tracker | *Next.js, React, Express.js, PostgreSQL, Prisma, JWT*

GitHub | Live Demo

- Built a full-stack finance platform for tracking income and expenses, managing monthly category budgets, monitoring savings, and analyzing spending trends through interactive dashboards.
- Designed a PostgreSQL data layer with Prisma ORM and Express REST APIs supporting authenticated transactions, categories, budgets, pagination, filtering, search, multi-currency preferences, and CSV export.
- Implemented JWT authentication, bcrypt password hashing, CORS controls, centralized error handling, and aggregated reporting endpoints for monthly cash-flow and category-level analytics.

FluxBoard – Real-Time Collaboration Platform | *React, Vite, Express.js, MongoDB, Socket.io*

GitHub | Live Demo

- Developed a real-time Kanban platform for software and DevOps teams to manage boards, workflow columns, tasks, checklists, priorities, comments, and multi-assignee collaboration.
- Implemented Socket.io board rooms for zero-refresh synchronization of task, column, board, and discussion updates, with optimistic UI interactions and persistent drag-and-drop ordering.
- Built role-aware collaboration and security flows with JWT access/refresh token rotation, bcrypt hashing, Mongoose validation, protected REST endpoints, and responsive React/Tailwind UI.

Education

Master of Computer Applications (MCA)

Expected 2027

Rungta International Skills University, Bhilai | CGPA: 7.6

Full Time

Bachelor of Computer Applications (BCA)

2025

Rungta College of Engineering & Technology, Bhilai

Full Time

Certifications & Achievements

- **Google Cloud Digital Campus 2.0 HackSprint:** Collaborated in a three-member team to build a Django based AI application using VADER sentiment analysis; Top 10 Rank and received a Certificate of Participation.
- **Backend Development by Packt - Coursera:** Learned Express.js Http server, REST API and MongoDB.
- **Introduction to Front-End Development by Meta - Coursera:** Completed foundational training in modern frontend development.
- **Foundations of Linux by Packt - Coursera:** Studied Linux distributions, command-line tools, and file operations.
